2026 GENETICS SALE

MONDAY, SEPTEMBER 21

60
BRANGUS
BULLS

SEEDSTOCK FOR THE REAL WORLD

CUSTOMERS COMMENTS

'With the help of your dedication to genetics we have turned this place around.'

'He is very balanced, sound footed and quiet...a real cow-getter in the paddock.'

'He's got an outstanding 99% calving rate. Nice sappy calves.'

'We go to (the Bimbadeen) sale because of the phenotype and the data.'

'Virility 100%... every heifer he was put with was pregnant.'

OUR VISION

Brangus seedstock with exceptional beef production, fertility
& breeding qualities - for stud & commercial clients

2026 GENETICS SALE

MONDAY, SEPTEMBER 21

bimbadeenbrangus.com

Welcome

Bimbadeen is celebrating many milestones in 2026 - from a decade of on-property bull sales to seven decades since 'Brangus' & 'Bimbadeen' became synonymous.

It's also 20 years since we (Mark and Amanda) moved to 'Upson Downs' with our family and became involved formally with running Bimbadeen.

We have not only survived a number of droughts (the one that greeted us on arrival in 2006 was a doozy) and at least five major floods in that time - all while our incredible Bimbadeen cow herd has gone from strength to strength. We always say that a major challenge gives you the opportunity to really 'measure what matters' - making the hard decisions about which cows to keep and which to sell. El Nino predictions are making some cautious, but we believe tried and tested Brangus breeders are the best investment for uncertain seasons.

2025 brought us late rain at our Nogo River breeding country and at our Jambin-based bull and steer depot. With 'Upson Downs' and 'Arthur's Knob' mostly bounded by waterways (the Nogo on the western boundary and Boogalgopal Creek to the east) and our Jambin blocks alongside Callide and Bell creeks, the boys certainly got plenty of practice repairing and replacing fencing.

The 2026 draft of Bimbadeen Brangus bulls showcase great skin, strong beef production, tidy underlines, fertility, soundness and masculine outlook. It has been interesting to observe this cohort come through the system - birth, branding, weaning & sale selection.

Leading the sire tally for this year's draft will be Bimbadeen TRAVOLTA T194^(PP) (IVF) - our stylish high content bull out of Brahman donor Akama ELLA by Bimbadeen QUARTZ Q1^(PP) (MC GRANITE 834B^(PP) x Bimbadeen Q105^(PP)) sold at our 2020 sale to DBR Grazing.

TRAVOLTA has the most terrific nature, growth and extraordinary 'doing ability' - regardless of work or weather, he seems to be 'in good condition' or 'even better condition'! He is a big EMA sire with a super neat underline, and plenty of bone and growth.

Following hard on his heels will be Ginoondan DRUMMOND^(PP) - a bull purchased from the ABCA Rocky Sale in 2021, by the super-deep & athletic Bimbadeen MAVERICK^(PP). DRUMMOND has a superb phenotype - so beefy from neck right through his back, deep barrel, loin and butt over a very balanced structure. Strong clean lines are also apparent in his beautiful, masculine Brangus head.

Stout & stylish lot 3 offering, Bimbadeen WYOMING W348 ^(PP) (above) leads the DRUMMOND sons into the ring, following standout MEMPHIS son (one of only two offered this year) Bimbadeen WAVERLEY W202 ^(PP) (at left) & eye-catching Bimbadeen WINDFALL W120 ^(PP) (below)

Those following on social media may already be acquainted with these young bulls - W120 was the star of our 2024 Christmas post!

It is very satisfying to be able to offer buyers quality right through the catalogue - from front to back. We love matching seedstock to clients and welcome all enquiries and pre-sale inspections.

Look forward to catching up with you.

Mark & Amanda and family

Featured sires

Ginoondan DRUMMOND ^(PP)

(by Bimbadeen MAVERICK ^(PP))

DRUMMOND has 11 sons in the 2026 sale

Bimbadeen TRAVOLTA T194 ^{(PP)(IVF)}

(by Bimbadeen QUARTZ Q1 ^(PP))

TRAVOLTA has 12 sons in the 2026 sale

Bimbadeen MEMPHIS ^(PP) has 3 sons in sale

BIMBADEEN'S COMMITMENT

We take great care to present all of our sale animals as fertile, functional animals on sale day.

To this end, all lots have been:

* **VET INSPECTED**

Bullcheck certificate

* **DNA TESTED**

Poll, coat colour & parentage

* **VACCINATED:**

- 7-in-1
- tick fever
- 3-day
- botulism
- vibrio.

* **FULLY SEMEN TESTED***- crushside (motility) and lab (morphology).

We expect our bulls to work naturally in the paddock and get pregnancies in their first season (providing they are kept in a reasonable condition and do not suffer any injury or illness post-sale).

Where there are any issues with your purchases (not affected by post-sale injury or illness) noted within the first 12 months, please discuss with us in the first instance.

Where there are issues that are post-sale injury or illness related, please contact your insurance company.

CATALOGUE CREATIVE CONTENT

© All artwork, photographs and content remain the property of Bimbadeen Cattle Co and Amanda Salisbury, and are protected by Australian and International copyright laws.

Unauthorized copying or reproduction is prohibited.

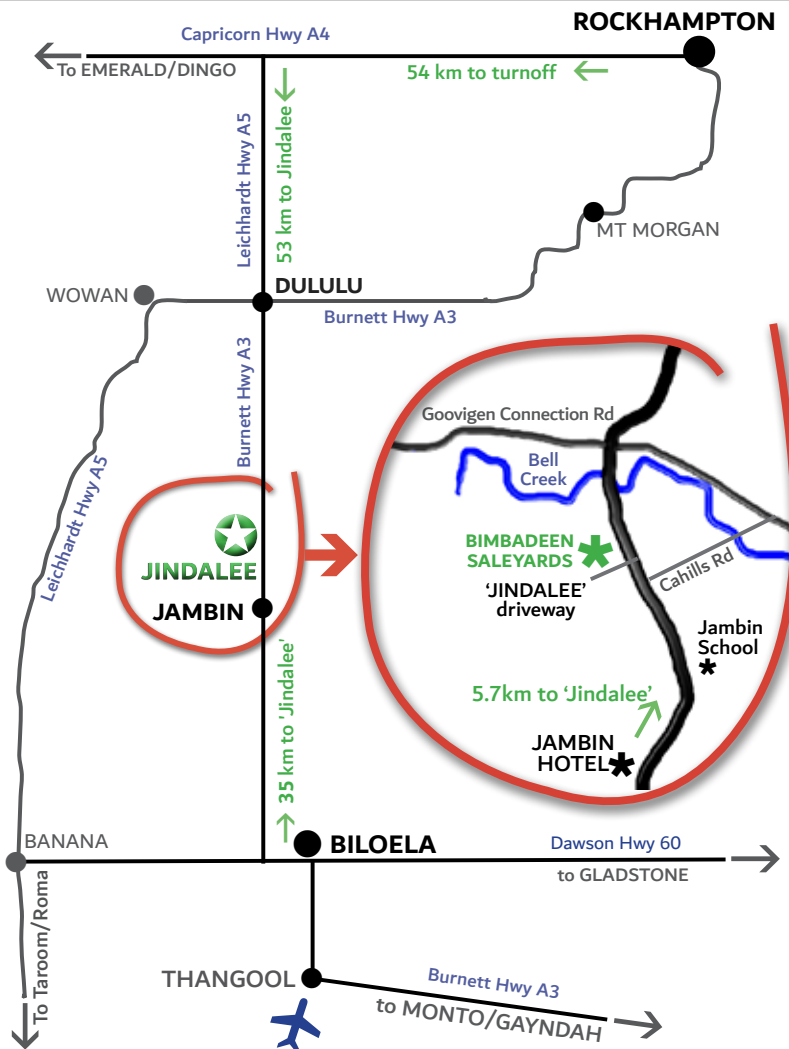

* We use Dr Stacey Rae (Monto Veterinary Group & President of the Australian Cattle Veterinarians (ACV)) and Beef Breeding Services for all semen testing.

ONLINE AGENTS

Livestreaming of sale and online bidding will be provided by **AuctionsPlus** (see p7 for details).

AUCTIONEER

We're delighted to once again have guest auctioneer Brian Wedemeyer working the microphone. Brian has provided his outstanding service for the past 9 on-property sales.

LOCATION

On-property at our new sale complex at 'Jindalee'. (See map & directions previous page). Smoko and lunch will be available. Prior inspections by appointment.

BULL PREPARATION

Sale bulls have been run in grass paddocks at our Jambin blocks and fed a silage mix designed to optimise health & performance.

HEALTH

All animals are visually vet inspected by Dr Stacey Rae (Monto Veterinary Group) and bulls will come with a BULL CHECK certificate. Where we observe any issues after inspection, we will note it in supplementary sheets.

VACCINATIONS

All bulls are vaccinated for Tick Fever, Vibrio, Botulism, 3-Day and treated twice with 5 in 1. Females are vaccinated for Tick Fever & 7-in-1.

FERTILITY

Dr Stacey Rae (Monto Veterinary Services) has crush-side tested, done scrotal measures. Beef Breeding Services have tested morphologies.

SEMEN RIGHTS

All bulls sell with 100% semen marketing rights. Bimbadeen reserves the right to collect up to 200 straws of semen from any bull in the Sale for use within our herd. Any semen collection would be at the vendor's expense and the purchaser's convenience. Bulls with semen retained have been noted on lot pages.*

ACCOMMODATION

Our new sale venue is just over an hour from Rockhampton, half an hour from Biloela and 5 minutes from Jambin. See page 5 for some motel recommendations and contacts.

OUTSIDE AGENT REBATE

A generous rebate of 4% commission will be paid to outside agents who:

- Register buyers *more than 24 hours before sale*
- Accompany a client to the sale; or attends the sale & purchase on a client's behalf;
- Must settle within 7 days.

BULK BUYER DISCOUNT

Buyers purchasing 7 or more bulls will be eligible for a 5% discount.

INSURANCE

All lots become the property of the buyer **from the fall of the hammer** - we highly recommend all buyers take out insurance immediately upon purchase. (See **Buyers Instructions**, p73).

SUPPLEMENTARY SHEETS

Will be available online before sale day, with latest info (current weights, scan data & semen results) printed for buyers on sale day.

MOVEMENT OF ANIMALS

Cattle will be clean on sale day ready for immediate transport (with a tick inspector available on the day). All lots heading to clean country will be re-inspected for later deliveries.

DELIVERY

Bimbadeen will deliver (free of charge) purchased sale lots to closest convenient location, where it fits with delivery runs in Queensland. We will assist with organising transport to other areas.

SALE DAY ETIQUETTE

We have designed our sale setup for maximum viewing opportunities - we recommend you do not enter the pens unnecessarily. Sale Day places extraordinary pressure on all animals - even the quietest bull can be unpredictable.

Never crowd the animals or loiter inside the pens - use common sense at all times.

Please call on any of the Kelco Agents or a Bimbadeen rep to stand up animals if required.

Ensure you pick up the supplementary sheet as you arrive - if you require further information on any animal, please ask Mark or Amanda.

Visitors enter the sale pens at their own risk - children must not enter the yards. All persons who attend the sale do so at their own risk.

The vendor assumes no liability, legal or otherwise, for any accidents which may occur.

TECHNICAL INFORMATION

Pedigrees and accompanying animal information in this catalogue are represented to the best of the the vendors' knowledge at the time of publication.

Every effort and all reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of printing.

However, neither the vendor or selling agents take responsibility in regards to the accuracy, reliability or completeness of the information provided, and do not assume any responsibility for the use or interpretation of this information.

You are encouraged to seek independent verification of any information contained in this catalogue.

THE BEST START FOR YOUR NEW SIRES

All sale animals will be leaving a familiar environment and mob, and will arrive to an unfamiliar situation at your property.

The truck ride can sometimes be challenging for a young animal, especially if they are travelling on their own. If you are not putting your new Bimbadeen bulls or females directly into a cow herd, it's a great technique to ensure they have company on arrival (with a couple of cows or steers waiting for them at your yards).

Our animals have been well handled with horses, dogs and ATVs, and on foot through yards. We treat our bulls (& females) with great respect and make a habit of handling them calmly - we recommend you do the same. Each animal has their own personality and response to pressure, but care has been taken in Bimbadeen's selection to ensure there are no general temperament issues.

Always ensure nutrition is sufficient to ensure females are cycling and bulls can hold condition reasonably, and your Bimbadeen investments should be producing for you in no time.

Keep us posted - we look forward to hearing how Bimbadeen seedstock are working for their new owners.

Why BUY BIMBADEEN?

We have been breeding Brangus seedstock for the Australian market for over seven decades.

Since Mark and Amanda have been involved at Bimbadeen full-time (20 years), we have consistently collected data and taken DNA from our stud & sale mobs.

We always assess phenotype as a priority and then bring in our data to help select bloodlines accordingly.

While DNA, EBVs, semen results and data can be excellent marketing tools, we believe in using them for our own assessment purposes first and foremost. They assist us to select the 'best of our best' for the Bimbadeen program & our clients.

We take great pride in seeing Bimbadeen animals go on to produce (for our stud and commercial customers) progeny that sell on for far more than initial investment in their sire or dam. That's what we call real 'value for money'.

BIMBADEEN LOT PAGES explained

(see facing page)

Semen testing & dam history

SEMIN TESTS KEY:

Semen testing includes crushside (motility) and lab (morphology) tests. All bulls presented on the day have passed or qualified with general results indicated in this catalogue in sidebars.

Motility: ✓ for pass (>60%).

Morphology: ✓ for pass (>70%) and **Q** for Qualified (50-70%).

'DAM'S HISTORY' KEY:

c : commercial (**steer/heifer**) f: heifer F: Sale heifer m: bull M: Sale bull **bold**: current lot

DNA tests & results

All 2026 Bimbadeen sale lots have had the 'Brangus Bundle', DNA testing for:

- POLL gene
- COAT COLOUR gene
- PARENT verification

COAT

ED/ED	Homozygous dominant black
ED/e	Dominant black/recessive red
ED/ E+	Dominant black/wildtype
E+/e	Wildtype/recessive red
E+/ E+	Homozygous wildtype
e/e	Homozygous recessive red

PARENT VERIFICATION

Each animal's unique genetic fingerprint is evaluated against the fingerprint of its expected parents. Multiple 'possible' sires can be nominated for each animal with matches confirmed or ruled out after analysis.

Results will be marked in catalogue lot pages as **VS** (Verified to Sire) or **VP** (Verified to Parents) .

POLL

When reporting Poll test results from a SNP based test, the results will be reported as below:

Result	Interpretation	Animal's Appearance
PcPc	Homozygous Poll (PP)	Predominately Polled (occasional scurs)
PcPf		
PfPf		
HPc HPf	Heterozygous Poll (PH)	Polled or Scurred
HH	Horned (HH)	Horned

Mating outcomes (statistically):

	P	P
P	PP	PP
P	PP	PP

PP x PP
100% progeny will be
PP polled

	P	P
P	PP	PP
H	PH	PH

PP x PH
50% progeny will be PP polled,
50% will be PH polled

	P	H
H	PH	HH
H	PH	HH

PH x HH
50% progeny will be PH polled,
50% will be HH horned

	P	P
H	PH	PH
H	PH	PH

PP x HH
100% progeny will be
PH polled

	P	H
P	PP	PH
H	PH	HH

PH x PH
50% progeny will be PH polled,
25% will be PP polled,
25% will be HH horned

	H	H
H	HH	HH
H	HH	HH

HH x HH
100% progeny will be
HH horned

Pc and Pf are interchangeable for 'P' in the graphic above.

A NOTE ABOUT TENDERNESS MARKERS

While we focus on many measures for meat quality (including IMF) we understand that this test (part of Brangus Bundle) offers a less reliable result than other DNA markers (above). Where it has been done, you can find Tenderness results online. We have not included them in this catalogue.

BREEDPLAN EBVs

GL - Gestation Length (days) is an estimate of the time from conception to the birth of the calf and is based on AI records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

BW - Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200D - 200 Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400D - 400 Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 - 600 Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MCWT - Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Smaller, or more moderate EBVs are generally more favourable.

The Mature Cow Weight EBV may also be used by steer breeders wishing to grow animals out to a larger weight.

BIMBADEEN DATA

We collect the following raw data for our own purposes and share the same data for BREEDPLAN submissions:

- weaning weights
- 200, 400 and 600 day weights
- scrotal sizes
- scans

Our breeders run in fairly rugged terrain in our granite country - we do not collect birth weights, with all cows & heifers expected to calve naturally in their breeding paddocks & protect calves from wild dogs. It is very rare for us to have to assist a birth (we will note if this occurs).

We have highlighted (**bold**) the traits in the 'lot info panels' which have been measured in our program.

EBVs shown are **AUGUST 2026** run.

MILK - Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200 and 400 day weights of her calves. For dams, it indicates her own milking ability.

SS - Scrotal Size EBV (cm) is calculated from the circumference of the scrotum, measured in centimetres and adjusted to 400 days of age. This EBV is an estimate of a sire's genetic merit for scrotal size and is positively correlated to age of puberty in female progeny.

Days to Calving (days) This EBV indicates the fertility of the daughters of the sire. It is the time interval between the date when the female is first exposed to a bull in a paddock mating to the day when she subsequently calves.

A negative EBV for days to calving indicates a shorter interval from bull-in date to calving and therefore higher fertility.

CWT - Carcase Weight EBV (kg) is based on abattoir carcase records and is an indicator of the genetic differences in carcase weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass.

(Rib & Rump cont') These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Reference SIREs - 2026 sale bulls

GINOONDAN DRUMMOND (PP)

DRUMMOND was selected at the 2022 Rocky ABCA Sale, by Bimbadeen MAVERICK. Chosen for his terrific, masculine phenotype, perfect fleshing, super-tidy underline and strong Brangus head. Dominant in a multisire paddock, DRUMMOND'S offspring reflect his best traits.

DNA: PcPc, ED/ED

Photo: 2 years of age

CATALOGUE: 12 sons

BIMBADEEN TRAVOLTA T194 (PP) (IVF)

Such a prepotent sire - TRAVOLTA is the ultimate cool dude, adding terrific backs (and EMAs - registering top 2% EMA EBV), perfect skin and underlines, very strong growth, bone and balance to his progeny. He has a wonderful calm nature and incredible ability to maintain his condition through the working season.

DNA: PcPC, ED/E+

Photo: 2 years of age

CATALOGUE: 14 sons

TRIPLE B NOBLE N450 (PP)

Top price bull at the 2019 BBB sale, NOBLE has produced some very stylish progeny over Bimbadeen cows. His pedigree reveals the strong influence of Suhr's Next Step & Brinks (Czonka & Bright Side 607L11) with his maternal grand dam showcasing Australian heritage. He offers good GL, birthweight & 400 day weight EBVs, top 15% scrotal size (fertility).

DNA: PcPC, ED/ED

Photo: 7 years of age.

CATALOGUE: 7 sons

TRIPLE B PINNACLE P313 (PP) (AI)

Top price bull at 2020 BBB sale and regularly used in our commercial paddocks, PINNACLE has developed into a very thick-set sire as he has matured - with sons being offered in this sale really showing true to type. Another big EMA-throwing Bimbadeen sire (top 3% EBV) he goes back to Greendale Xciting 029.

DNA: PcPC, ED/ED

Photo: 2 years of age.

CATALOGUE: 8 sons

Reference SIREs cont'

PHEASANT CREEK QUAID Q4 ^(PP)

A young purchase from Pheasant Creek who completed early sire duties in commercial paddocks before being promoted. QUAID's EBVs (and progeny) reflect a terrific balance of weights & fats - top 30% for 200/400/600/MCW/Carcase weight & top 5% or better for his fats.

DNA: HPc, ED/ED

Photo: 15 months

CATALOGUE: 4 sons

RAMSEY CREEK LEEROY L28 ^(PP)

LEEROY was purchased after a successful show career with Ramsey Creek Brangus. He has sensational skin, style and sheath design, with strong sire appeal and a really beautiful nature. We like the way his progeny reflect these traits, with weights keeping pace with their cohort.

DNA: PcPc, ED/ED

Photo: 2 years of age

CATALOGUE: 3 sons

BIMBADEEN MEMPHIS ^(PP) (AI SIRE)

Naturally bred from our two most influential bloodlines - super-cow Bimbadeen D0135 ^(PP) and Oaklands AMBASSADOR ^{(PP)(ET)}. MEMPHIS is phenotypically balanced bull with consistently impressive EBVs across growth, fertility and carcass traits - top 3% scrotal, top 4% 200dw, top 9% 400dw, top 20% fats & top 15% IMF.

DNA: PcPc, ED/ED

Photo: 3 years of age

CATALOGUE: 2 sons

REDLINE TOYBOY CORTEZ 22/348 ^(PP) (AI)

Super neat in design, with great skin and sheath, CORTEZ offers a very functional outcross to TRIO'S MLS CORTEZ 175C6 ^(P) ^(ET) with 'curvebender' weight EBVs. He has a lovely flank and strong pink points with sons registering very strong morph results.

Acknowledgements

A huge thanks to all who come together each year to make our sale a success.

To our behind-the-scenes workers - from the core Bimbadeen team who work year-round to see each drop of calves through branding, weaning & seedstock selection, and friends who assist on sale day. And to the Jambin P&C for catering. Your support is invaluable.

To all the specialists who work with us to prepare our sale animals - including the Monto Vet team assessing animals and undertaking semen testing, David Reid doing our scans, Barry Williams providing nutrition advice, videographer Prue Bygraves capturing each animal for buyers to study online, Susie McLachlan for recording sale day action, and the Kellco team led by Andrew and Brendan, & auctioneer Brian Wedemeyer... you are all appreciated!

To our buyers and underbidders - for making the effort to research, travel and attend our sale and chase your chosen lots. To our valued return clients who come from all over to invest once again in Bimbadeen genetics - your support is always deeply appreciated and your faith in our program inspires us on. To new customers who have bid in person or online, thankyou. We look forward to seeing how your Bimbadeen sires work for your herd - there's nothing we love more than calf photos!

We never take any of you for granted.

The businesses showcased on the following pages work closely with Bimbadeen to help us produce the quality studstock we strive to offer you, our buyers. We thank them for their ongoing support.

2025 BIMBADEEN SALE

Our first sale at the new venue at 'Jindalee' (Jambin) had great support from long-term and new buyers from stud & commercial enterprises. The Holzart family of **Kanda Brangus**, Charters Towers took home top-price bull, Bimbadeen VALENTINO V001 ^(PP) in their line of four new sires. **Kingsborough Pastoral** (Aramac) & **Cedarvale Pastoral** purchased 4 bulls each, with Hardy Campbell (Takilberan) purchasing the second top price bull with 3 new sires.

A huge thanks to all buyers, underbidders & our wonderful team!
